Re: Executive Order President Biden
Ambassador Susan Rice; White House Domestic Policy Council
United States Marriage Sustainment Act; All the Matters of Marriage

The Executive Order Proposal:

The Marriage Sustainment Act

MARRIAGE will be listed as an Issue, Title, and Category to promote and advance marriage success across all government Departments and Agencies for the benefit of ALL the people.

Dear Advisor Jarrett,

I am reaching out to you because I am hoping you would help me get the proposed Executive Order idea become law, and share this letter with the law makers.

My name is Bonnie Gilliams, and I have worked very hard to find legislators and policy makers to take this task, and have not succeeded yet. I am the sole owner of Womenspath .Org, Inc. I have done extensive research based on science, and wrote the All States Marriage Sustainment Act United States Handbook, cataloged at the Library of Congress.

The TITLE Marriage needs a Framework in government (it is not there yet), and an organized system is needed to find laws, civil rights, education, and trusted resources for ALL American INDIVIDUALS, not matter of richer or poorer or which state they reside, creating a model for the states to follow.

Because marriage crosses state lines, and most federal Agencies and Departments have existing resources that can steward the TITLE, keyword, topic, issue, I believe making Marriage a priority in government for the American people will eradicate many of our social issues at root cause. For example f.s. 741 —Florida marriage law= Marriage; Domestic Violence.

The Marriage Sustainment Act

The idea: (CDC-90% adults marry/50% fail)

- TITLE creates Framework for marriage information
- TITLE creates organization system for new and ongoing laws
- To enhance and protect the health, well-being and success of every American marriage
- Assist in public interest and provide awareness for self directed education
- Promote added value for marriage education across all government agencies and Departments when applicable
- Disclosure of where to find trusted free sources
- PROTECT THE CIVIL AND OTHER RIGHTS OF INDIVIDUALS IN MARRIAGE

I believe this effort will bring beauty back into marriages, and save the next generation — especially, from falling into the pitfalls. Would you consider helping me get this idea into the hands of the public—through an Executive Order Proposal?

Thank you so much for all your life works.

Kindest Regards,

Bonnie Fey Gilliams
